

fluffbotics

We bring your toys to life
...by making play time interactive using our advanced AI chips

founders@fluffbotics.com

Custom AI modules

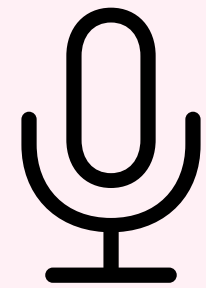

Custom PCBs with AI processors, mic, speaker, and more bring toys to life by making play more fun and interactive

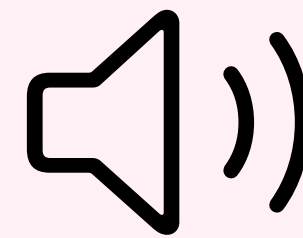

Immersive characters

Our software platform uses LLMs to create cheerful, lifelike personalities you can deploy to customers—complete with analytics.

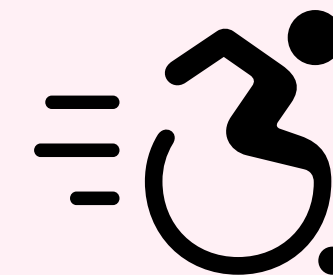

Hardware features

Advanced 4-mic array
for crystal clear input

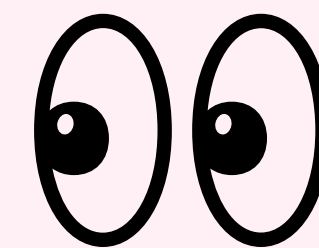

Beam forming drivers
for a rich, full sound

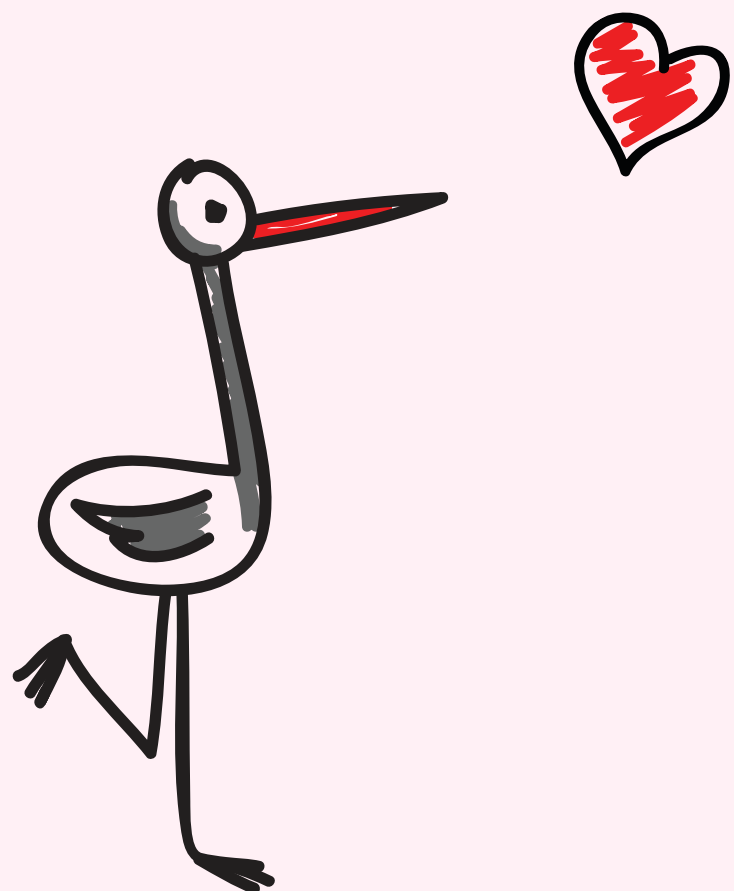

Contextually aware
movement & motion

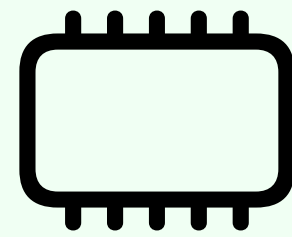

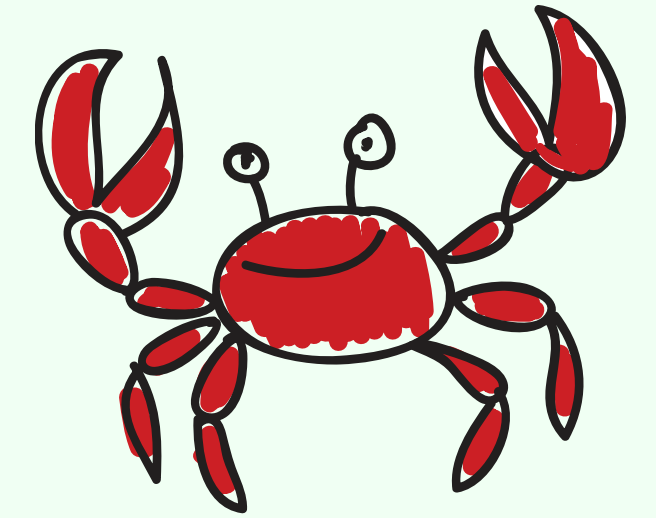

Understands petting,
poking, or impacts

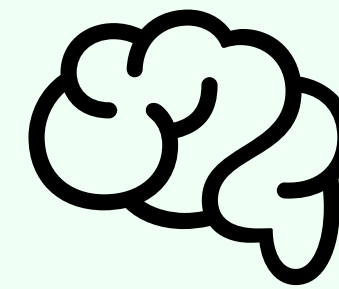

Vision enabled, sees
what's going on

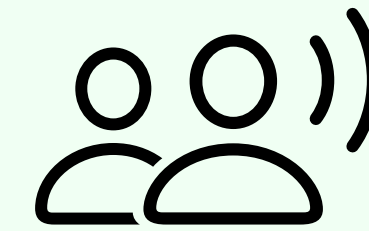

Software features

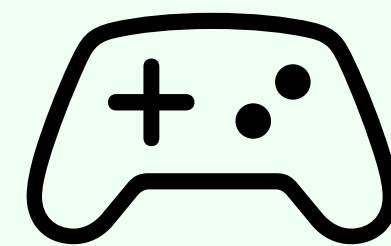

Fine tuned LLMs feel
lifelike and immersive

Remembers you, gets
smarter every day

Understands multiple
users in one house

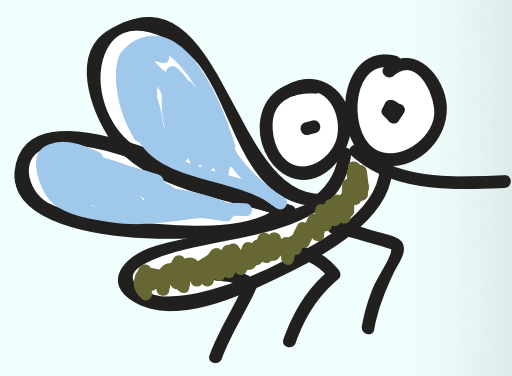

Engaging games, fun
storytelling adventures

Versatile, smart, the
best learning sidekick!
